

KINVET FlockDrop

“Gut Strong. Birds Happy. Profits Better.”

How to Use KINVET FlockDrop (Instructions):

For Everyday Health:

- **Mix 1 kg KINVET FlockDrop in 1 ton of regular feed.**
- Use it daily to keep droppings firm and birds active.

If Birds Have Loose Motions or Smelly Droppings:

- **Mix 2 kg per ton of feed for 5 to 7 days.**
 - Once droppings are back to normal, go back to the 1 kg dosage.
-

Farmer’s Do’s – Best Practices to Follow:

1. **Store Smart:**

- Keep the bag in a dry place, away from sunlight and moisture.
- Tie it tight after opening – gut products don’t like dampness!

2. **Mix Well, Mix Right:**

- Add KINVET FlockDrop slowly while mixing feed.
- Make sure every handful of feed smells the same – that means it’s mixed properly.

3. **Clean Water = Healthy Gut:**

- Give fresh, clean water daily.
- Wash drinkers – birds won’t heal if water is dirty.

4. **Watch the Droppings:**

- One look at droppings tells the health story.
- If they look runny or smell bad, increase KINVET FlockDrop for a few days.

5. **Keep the Shed Dry:**

- Wet floors = sick birds.
- Remove wet litter daily and keep the air flowing.

6. Use for All Birds:

- Safe for chicks, growers, layers, broilers – no medicine withdrawal worries.
-

Farmer's Don'ts – Avoid These Mistakes:

1. Don't Add Extra Thinking It Helps:

- More isn't always better. Stick to the dose. Call your vet if unsure.

2. Don't Let Bags Sit Open or Get Wet:

- Moisture kills the power of the product. Close it tight.

3. Don't Mix with Strong Antibiotics Unless Told:

- Let natural gut balancers do their job unless your vet says otherwise.

4. Don't Delay in Cleaning Feeders or Waterers:

- Old feed or dirty water leads to gut issues. Clean regularly.

5. Don't Panic with Loose Droppings:

- Start KINVET FlockDrop immediately. Most birds bounce back in 2–3 days.

6. Don't Let Visitors Walk In Without Care:

- Disease can walk in on shoes. Keep footbaths and limit shed entry.
-

Farmer Tip:

“Birds won't tell you they're unwell – but their droppings will. KINVET FlockDrop helps you act early and avoid costly treatments.”
