

KINVET YeastPro

Rumen relief, naturally restored digestion

How to Use KINVET YeastPro Bolus

- **Cows & Buffaloes: 2–4 bolus/day**
- **Calves, Sheep & Goats: 1–2 bolus/day**

Administration Method:

- Give directly into the mouth or mix into feed.
- Ensure clean water is always available.
- Follow the veterinarian's guidance for tailored dosage in special conditions.

Frequency of Use:

- Use once daily, ideally during morning feeding.

Farmer Practices: Do's

✓ Do's

- **✓ Store properly:** Keep in a cool, dry place, sealed after use.
- **✓ Observe behavior:** Monitor feed intake, feces quality, and bloating.
- **✓ Use consistently:** Daily use ensures better digestive stability.
- **✓ Check expiry:** Use within 24 months of manufacturing.
- **✓ Seek vet input:** For persistent issues or altered dosing needs.

Farmer's Don'ts – Avoid These Mistakes:

✗ Don'ts

- **✗ Don't mix with hot feed or water** – Long time exposure to heat may deactivate the yeast.
- **✗ Don't expose to direct sunlight or moisture** – May compromise efficacy.
- **✗ Don't skip doses during stressful periods** – Consistency is key.

- **✘ Don't assume one dose fits all** – Adjust based on weight, condition, and age.

Pro Tip

“Don't wait for signs of trouble. A daily dose of KINVET YeastPro keeps appetite strong, dung normal, and performance on track!”
