

KINVET PigNatur

“Boosting Growth, Enhancing Efficiency, Naturally Healthier Herds.”

How to Use KINVET PigNatur

Feeding Instructions:

- **Dosage:** Incorporate 500–750 grams of KINVET PigNatur per ton of feed.
- **Adjustment:** Tailor the dosage based on the pigs' age, health status, and specific farm conditions, or as recommended by a veterinary nutritionist.

Best Practices : Do's

1. **Optimal Storage:** Store KINVET PigNatur in a cool, dry place, shielded from direct sunlight and moisture, to preserve its effectiveness.
2. **Thorough Mixing:** Ensure even distribution by thoroughly mixing KINVET PigNatur with the feed, promoting consistent nutrient intake.
3. **Regular Health Monitoring:** Observe pigs consistently for signs of improved appetite, weight gain, and overall vitality.
4. **Clean Water Access:** Provide pigs with uninterrupted access to clean, fresh water to support digestion and nutrient absorption.
5. **Balanced Nutrition:** Integrate KINVET PigNatur into a well-balanced diet to maximize growth and health benefits.
6. **Maintain Hygiene:** Regularly clean feeding equipment and storage areas to prevent contamination and ensure feed quality.

Common Mistakes : Don'ts

1. **Overdosing:** Avoid exceeding the recommended dosage, as it does not expedite results and may lead to unnecessary expenses.
2. **Improper Storage:** Do not leave the packaging open; exposure to air and moisture can compromise the product's efficacy.
3. **Incompatible Mixing:** Refrain from combining KINVET PigNatur with other supplements without consulting a swine nutrition specialist.
4. **Neglecting Monitoring:** Failing to observe swine health can result in missed signs of improvement or emerging issues.

5. **Ignoring Feed Quality:** Do not use spoiled or contaminated feed, as it can negate the benefits of KINVET PigNatur and harm pig health.

Pro Tip

Incorporate KINVET PigNatur into your regular swine management practices to enhance appetite, improve gut health, and boost immunity—leading to faster growth, better feed conversion ratios, and healthier herds.
